## Goals for How long do you travel to get to school?

What can we do?

### Walk or bike

Walking or biking is the best way to get places, because zero carbon is released into the atmosphere! Besides, it's a great way to get outside, get some exercise, and get a little time away from your parents who are always driving you around.

## Goals for How long did it take you?

What can we do?

### Fly a little less

Next time you go on vacation with your family, check how you're getting there – are you driving, taking trains or buses, or flying? Unless there is really no other way to get somewhere, try not to take a plane. Flying emits a huge amount of carbon dioxide – a flight halfway across the world emits as much carbon dioxide as many people emit in an entire year!
